Identified Uses for SDIOC substances:

The following tables represent the outcome of our questionnaire campaign to identify the downstream uses SO₂ based substances covered by SDIOC and further requests (status: July 2010). The table gives a general overview on the identified key uses (exclusion of distributor/trader and formulator) and possible grouping.

Uses excluding Distributor/ Trader and Formulator	Grouped Uses
Photographic Industry	Photo-graphic Industry
Chemical Industry/ Production	Chemical Industry/ Production
Textile Industry	Textile/Leather industry
Leather Industry	
Rubber Industry Plastic	Rubber Industry
Paper and Pulp Industry	Paper and Pulp industry/ Bleaching
Bleaching of minerals	
Processing aid for fructose and sugar production	Food industry
Food industry	
Starch industry	
Water treatment	Water treatment/Mining/ Metal industry*
Water treatment in oil drilling	
Mining	
Metal industry/surface treatment	
Carbon fibers	Fibre industry
Fiber Industry	
Additive for cement	Additive for cement
Agriculture and fertiliser industry	Agriculture and fertiliser industry
Exemptions	Food industry (as food additive), Pharma industry/cosmetic industry

*These uses were grouped because in all cases the substances linked to this use are utilised for removal of an oxidizing agent
